Hush Acoustics

Visarlo Acoustical Wall and Ceiling Coverings

https://visarlo.com/

Ceiling baffles and acoustic panels aren't going anywhere, but it's nice to have a new option to control sound transmission. Visarlo is an acoustic fabric that stands off slightly from the wall or ceiling, making it possible to incorporate backlighting. The fabric has the thin profile of wallpaper and custom designs are available.

Photos courtesy of Hush Acoustics

Turf

Slat Wall Scape in Wood Grain

https://turf.design/products/slat

It's not until you reach out and touch these acoustic panels that you realize they're not actually wood, but PET felt. This gives designers a new set of options (including the appearances of oak, ash, maple, teak, and walnut) to deliver acoustic control without compromising on design.

L'Impatience

Mutual Core Sculptural Ceramic Loudspeakers

https://limpatience.com/pages/mutual-core-mki-hand-built-speakers

These hand-built speakers comprised of a ceramic horn and a wooden cabinet deliver an impressive sound quality. The design manages to be both modern and retro and looks unlike anything else we've seen. Sculptural in nature, they also provide a satisfying tactile experience.

Leon Speakers

Ente Sound Tile

https://www.leonspeakers.com/ente-soundtile-2025

No matter how well-designed, audio speakers are usually not the focal point of any space – but now they can be. Both space-saving and eye-catching, these sound tiles include plug-and-play Sonos speakers faced with custom artwork. Made from solid hardwood and available in 36” squares and 24” squares.

Photos courtesy of Leon Speakers

Media Décor, a Leon Company

Moving Art Screens

https://mediadecor.com/product-category/moving-art-screens/

This clever system conceals TV screens and large displays behind museum-quality, giclée printed artwork that easily retracts into the frame via remote control. Ideal for guest rooms, meeting rooms, and even single-family homes. Both the artwork and the frame can be selected from a large in-house library or can be custom-made.

DARRAN Studio

Central Bark

https://www.darran.com/product/central-bark/

We would be remiss if we didn't include this line of pet beds that integrate with office furniture. Clearly designed by someone who loves dogs, the bottom drawer pulls out to reveal a built-in dog bowl. For anyone whose co-worker is their dog, Central Bark is a great addition to the office.

DARRAN Studio

Neva

https://www.darran.com/product/neva/

Neva is a convertible, sitting-standing desk for conference spaces. Operating as one integrated unit, the TV moves as the table height changes to maintain the proportion between the screen and the table surface. This seemingly small adjustment opens up all new possibilities for flexible office spaces. Available in a wide selection of materials and finishes, it's a strong contender for office, educational, and healthcare spaces.

IKEA

MITTZON Acoustic Desk Screen

https://www.ikea.com/us/en/p/mittzon-acoustic-screen-for-desk-gunnared-beige-70528215/

Traditional desk screens can make people feel like they're being isolated, but these feel more like a reward. Plush with removable and washable covers, these screens absorb and reduce sounds in open workspaces. They also function as a lightweight tackboard for pinning up notes and ephemera. Designed to complement the MITTZON desk.

Photo courtesy of IKEA

Kettal

“A” Desk Dividers

https://workplace.kettal.com/en/collection/a/

“Wicker desk dividers” may sound like a fever dream, but these from Kettal’s “A” Collection Workspace line will make you a believer. They slide on to desks and can be easily moved. The wicker introduces a nice organic element to any room and the design and craftsmanship turn the material into something beautifully elevated that would work in hospitality as well as in commercial spaces.

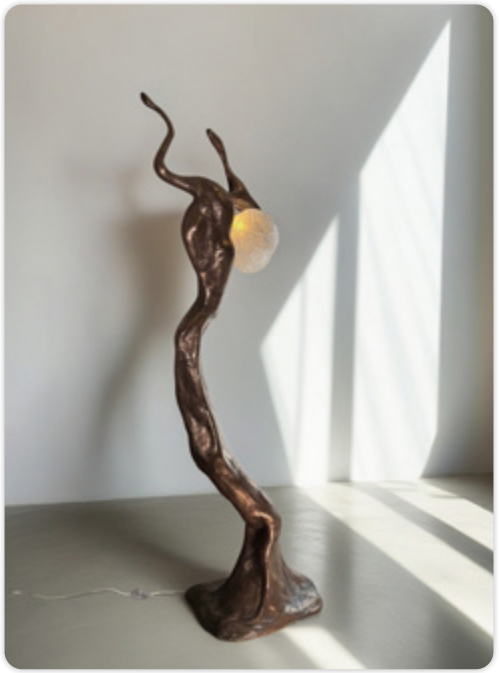

aeny studio

Floor Lamps

https://www.aenystudio.com/projects

Functional lamps that are also works of art. Sculpted by hand from recycled steel, mesh, fiber composite, bronze powder, carnauba wax, and fiber-based bio resin. Each lamp is unique, lending an individuality and organic feel to any space.

Photos courtesy of aeny studio

Erin Lorek

The Pendants

https://erinlorek.com/

Incorporating stainless steel and iron-cast glass, the Pendants series defies categorization. Part function, part decoration, these unique handmade objects shape, wash, and bounce both direct and indirect light. The Pendants can be grouped and hung in a variety of ways to create different desired effects.

Photos courtesy of Erin Lorek

Holly Hunt

Liberty Hanging Light

https://www.hollyhunt.com/product/liberty-hanging-light

LED lights encased in alabaster create a finish that reads like crystal. The industrial form creates a nice tension with the seemingly delicate material, and by grouping the lights differently you can create a Centre Pompidou-inspired look or a something more suggestive of flying birds.

Holly Hunt

Torus Pendant

https://www.hollyhunt.com/product/torus-pendant

With an eye-catching shape and a subtle texture of rippling water, the Torus pendant introduces natural elements in an incredibly modern way. The pendant can be hung alone or grouped together at different heights. Stock options, made-to-order, and custom options are all available. Torus is also available as a sconce and a three-pendant chandelier.

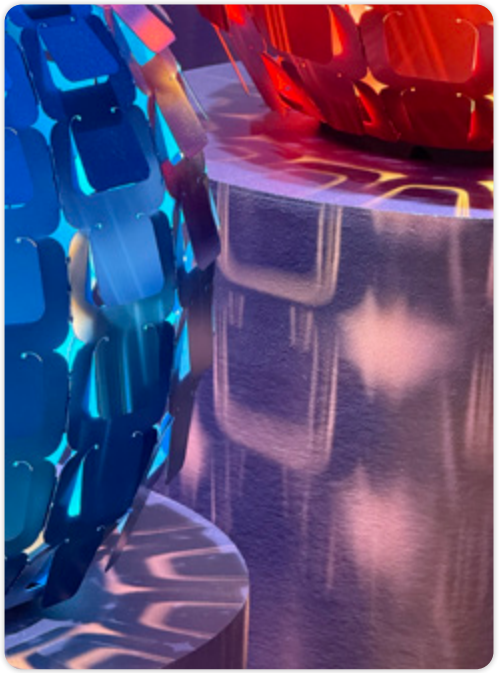

Justin Bailey Design

Polyp Lamps

https://jbaileydesign.com/

These lamps emit a gentle, warm glow that is both comforting and sophisticated. The organically inspired shapes provide a connection with nature even in more sterile design schemes. Subtle differences between the models mean the lamps read well whether in groups or as singles. Made from synthetic, tree-free paper and recycled materials or aluminum and ebonized milled maple.

Photo, right, courtesy of Justin Bailey Design

MIRORlab

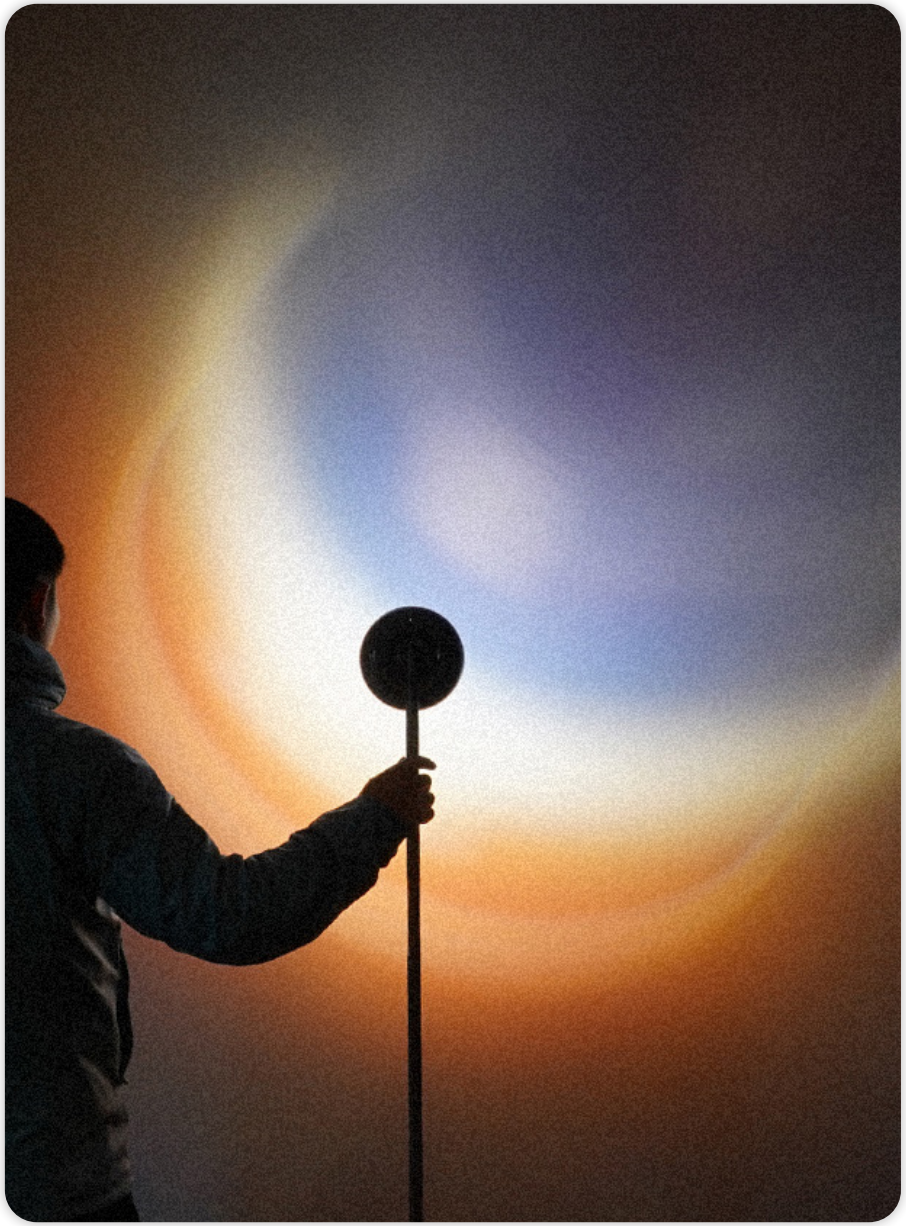

The Miror and Lamps

https://mirorlab.com/

When we first saw the Miror, we didn't think, "That's amazing." Then we saw what happened when it was turned on. Different lenses create projections that mimic sunsets, lunar rotations, comets, nebula, and gentle fluid patterns. The light completes a full rotation once per minute. Perfect for calming a space or creating a meditative element. Other options, like Dream Sailor, Cosmos, and Overture, create equally stunning visuals.

Photos courtesy of MIRORlab

MushLume Lighting

Sconces and Pendants

https://mushlumelighting.com/

MushLume lighting products aren't made – they're grown. Sustainable hemp is combined with mycellium to "biofabricate" these beautiful sconces and pendants. Each one is slightly different due to the growing and fabrication process. The result is a sculptural, organic work of art.

Kohler X Arsham

Landshapes™ Collection

https://www.kohler.com/en/products/kohler-collections/daniel-arsham-landshapes-collection

The Landshapes ™ collection is unexpected and attention-grabbing. Our favorite product is the sink. The shape recalls a naturally occurring pool of water and the undulating form provides a satisfying surface to grip as you begin and end your day.

Magnuson Group

PIC Waste Receptacle/Planter Combo

https://magnusongroup.com/products/wastereceptacles/pic.html

The PIC makes it possible for even the most spartan office to introduce an organic element. The planter and the waste receptacle are completely divided and the planter functions the same way any traditional standalone planter would, accommodating any appropriate plant and not requiring any additional water or power hook-up.

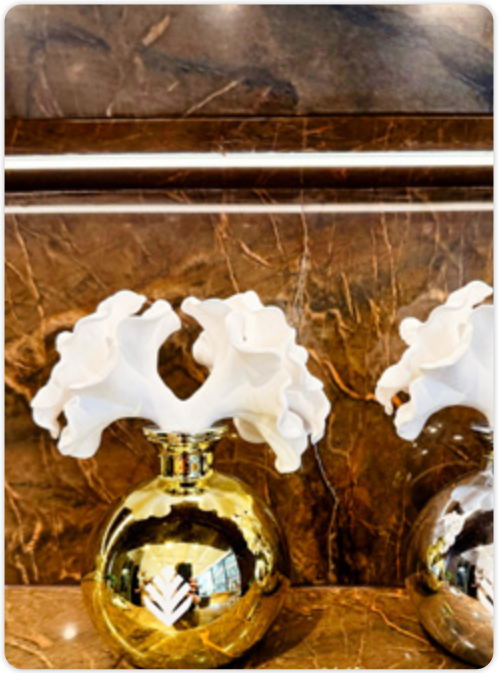

Tania Bulhões

Diffuser

https://taniab.com/collections/porcelain-diffusers

Products don't have to be large to make a big difference in a space. These elegant diffusers were designed as porcelain flowers that emit one of the brand's delicate and realistic fragrances inspired by white tea, orchid, fig, and forest. The natural form of the flowers rendered in inflexible porcelain adds a slight whimsy that makes it suitable for residential and commercial use.

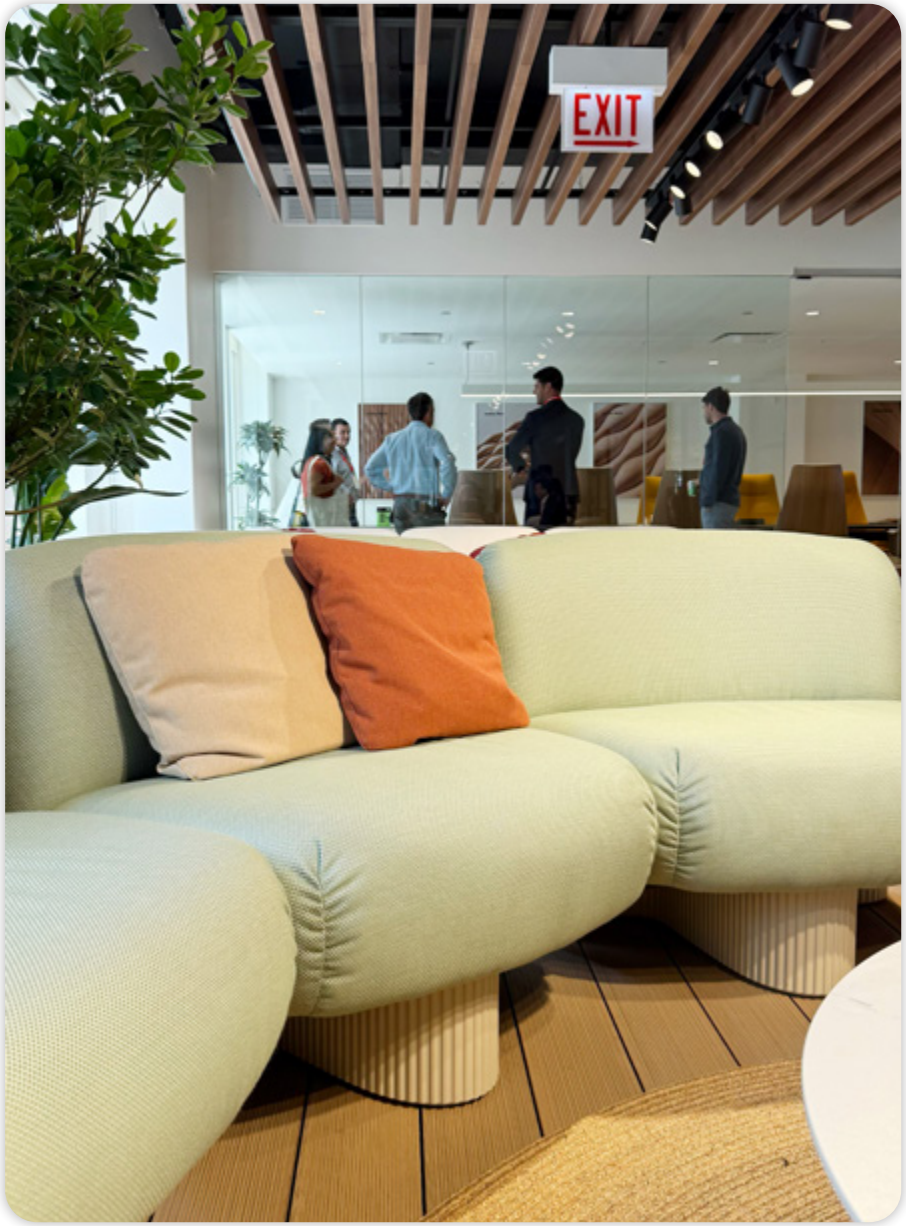

Andreu World

Bolete Lounge BIO

https://andreuworld.com/en/products/soft-seating/sofas/bolete-lounge-bio

There's frequently a trade-off between flexibility and comfort in configurable seating. Not so with the Bolete Lounge BIO. Each chair is a building block in what can become a unique seating design. The eye-catching base reinforces the overall modernity and creates room for feet and bags.

BuzziSpace

BuzziCee with BuzziPlanter

https://www.buzzi.space/acoustic-solutions/buzzicee

There's nothing like a trade show that can make you appreciate comfortable seating. The BuzziCee configurable seating was incredibly soft, and the matching BuzziPlanter added a welcome surprise – how often can you squeeze a planter? Perfect for any kind of gathering or informal meeting space, BuzziCee allows people to simultaneously maintain eye contact and physical distance.

Isomi

Knit One Chair

https://isomi.com/products/knit-one-chair

The Knit One Chair is made from a 3D-knitted textile that yields comfort and a little bounce. This eliminates the need for the underpinning foam that tends to be part of traditional chairs, significantly cutting down on product waste and allowing flat-pack shipping. The modular design means chairs can also be grouped together to create extended seating.

Kim Markel

Glow Furniture

https://www.kimmarkel.com/#glow

Made from recycled resins, these pieces have the look of glass that's illuminated from within. They appear delicate, as if they might melt, but are suitable for normal daily use. The colors are joyful without being overbearing.

Spec

Tailor Modular

https://specfurniture.com/products/seating/tailor/tailor-modular

It can be difficult to find configurable furniture for flexible spaces that doesn't look institutional. The Trilor Modular line offers fabric and seating customization to fit a variety of aesthetics and use cases. Power modules can be added for charging devices, and additional seating can be added seamlessly as organizations grow.

Heller

Honeycomb Modular Shelving in Worry-Free Plastic

https://www.hellerfurniture.com/products/honeycomb-modular-shelving

Heller has reimagined the original 1970's design of its Honeycomb Shelving as a modular system that can be configured for varying room shapes and sizes. What makes this a must-consider item is its Worry Free Plastics material: made of 100% recycled polypropylene, Heller's proprietary technology embeds an organic enzyme that will cause the product to completely biodegrade into nutrient-rich, microplastics-free soil within five years of being placed in a landfill.

Magis S.p.A.

Elysée Bookshelf

https://www.magisdesign.com/product/elysee/?codice=AMER&showprice=1&codiva=&valuta=&stato=North+America

Whether used as a bookshelf, a room divider, or both, this beautifully designed and engineered bookshelf introduces a sculptural element into any space. An updated version of Pierre Paulin's 1971 design, the Elysée Bookshelf looks vintage without the wear and tear.

Spacestor

Palisades II

https://spacestor.com/en-us/products/space-dividers/palisadesII/

This is the Swiss Army knife of products. Primarily a space division system, Palisades II can also function as a modular storage system, curved storage system, canopy, bench, planter, and more. The variety of available sizes and accessories allows for custom grids that suit almost any space.

Molo

Paper Softwalls and Softblocks

https://molodesign.com/collections/space-partitions/

We are unapologetic fans of molo. We have several in our studio, after discovering them at ICFF. They are a genius product: beautiful, configurable, easy to move and store. We use them as space dividers and backdrops; they can be positioned as key focal points in a room but also recede nicely if desired. These are made from paper but there are also textile and aluminum versions available.

Photos courtesy of molo

Spacestor

Aeonica

https://spacestor.com/en-us/products/meeting-spaces/aeonica/

This modular wall system dampens sound and creates a more calming, tranquil space. Spacestor offers a wide range of pre-configured designs as well as the ability to customize the product. Inspired by classical architecture, Aeonica provides a new option for designing innovative work environments.

Tuuci

Ocean Master M1 Voilare & M1 Voilare Wonder Umbrellas

https://www.tuuci.com/product/ocean-master-m1-voilare/

These aren't your typical outdoor umbrellas. Tuuci's parasol design and unique patterns elevate the product into a sophisticated must-have for chic outdoor spaces. The large coverage area and underside print create an "invisible room" with a luxury feel.

Tuuci

Ocean Master Max Solanox Pergola

https://www.tuuci.com/product/max-solanox/

Elevate outdoor spaces with this beautifully designed, customizable pergola. Including both heating and cooling options, it can be used in a variety of climates. A wide range of styles and finishes are available, along with advanced lighting and control features.

Venue Industries

Nest Pod

https://venueindustries.com/product/nest-pods/

These mini hideaways can be positioned against a wall or as freestanding nooks that are open on either side. Multiple pods can be placed together and two different seat heights are available. It's an ideal solution for incorporating quiet spaces that don't feel solitary.

Assembled Works, Philip Nimmo Design

Forma Table

https://assembledworks.com/artisan/philip-nimmo-design/forma-dining-table/

The uniqueness of the base easily caught our attention. The light reflection from the gold leaf on the interior frame creates incredible reflections and shadows onto the ground, giving the product an artistic feel. The top of the table includes a glass sheet that allows you to see through the table to the unique design. Multiple patterns are available.

Enwork

VOU™ Conference Table

https://www.enwork.com/products/vou

The modern version of King Arthur's Round Table. With options for shapes of "V," "O," and "U," this conference table ensures visibility for all participants. The "V" option offers the additional benefit of less neck strain when team members look toward the front, making it a formidable option for conference centers, office buildings, and anywhere else long meetings are routine. The conference tables include integrated power, and the "O" table includes a removable section to open up the enclosure.

Opiary

Planter Tables

https://opiary.com/CALDERA

These concrete indoor/outdoor tables that double as planters provide a mesmerizing contrast of exacting design and organic forms. While the most likely use case is an outdoor space, they also provide an interesting alternative to traditional entry hall tables with vases of floral arrangements.

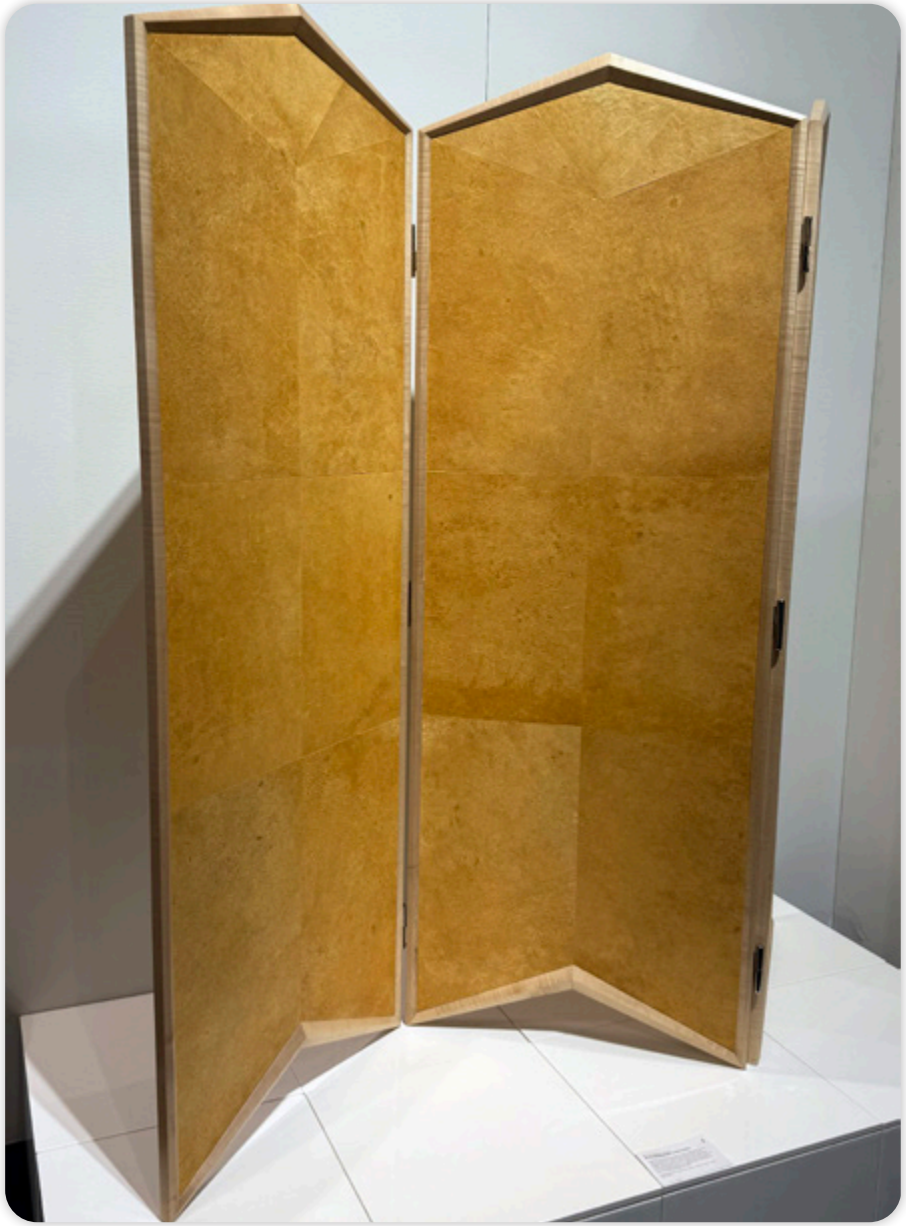

MycoWorks

Reishi™ Mushroom Leather

https://www.mycoworks.com/products

Mushroom leather is a revelation for anyone avoiding animal-based products, but Reishi™ isn't a leather also-ran. It's a beautiful, malleable material that can be dyed to match almost any animal-based leather. They've created a range of textures and softness from "new" to "leather club chair you've had for 50 years." Reishi can be used for furniture as well as wall coverings and objects, like chess boards.

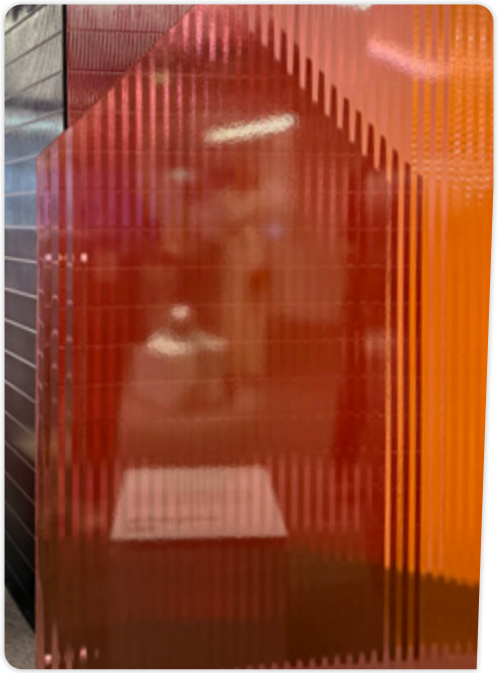

3Form

Edge Modular Wall Feature

https://3-form.com/products/edge-modular-wall-feature

Made from 50% post-consumer recycled material, this modular wall feature provides options for elevating a blank wall. Different undulating patterns and colors are available, and features can be layered to create unique looks with depth.

Clarus

Glass Boards

https://www.clarus.com/wall2wall/

Clarus offers a range of glass boards, but several of the ones on display at NeoCon inspired additional ideas about how they could be used in hospital and education spaces. By using custom shapes and designs, these boards can be turned into games. Whether the goal is gamifying how patient information is captured or providing a distraction, these boards provide lots of options.

Photos courtesy of Clarus

Impact Acoustic

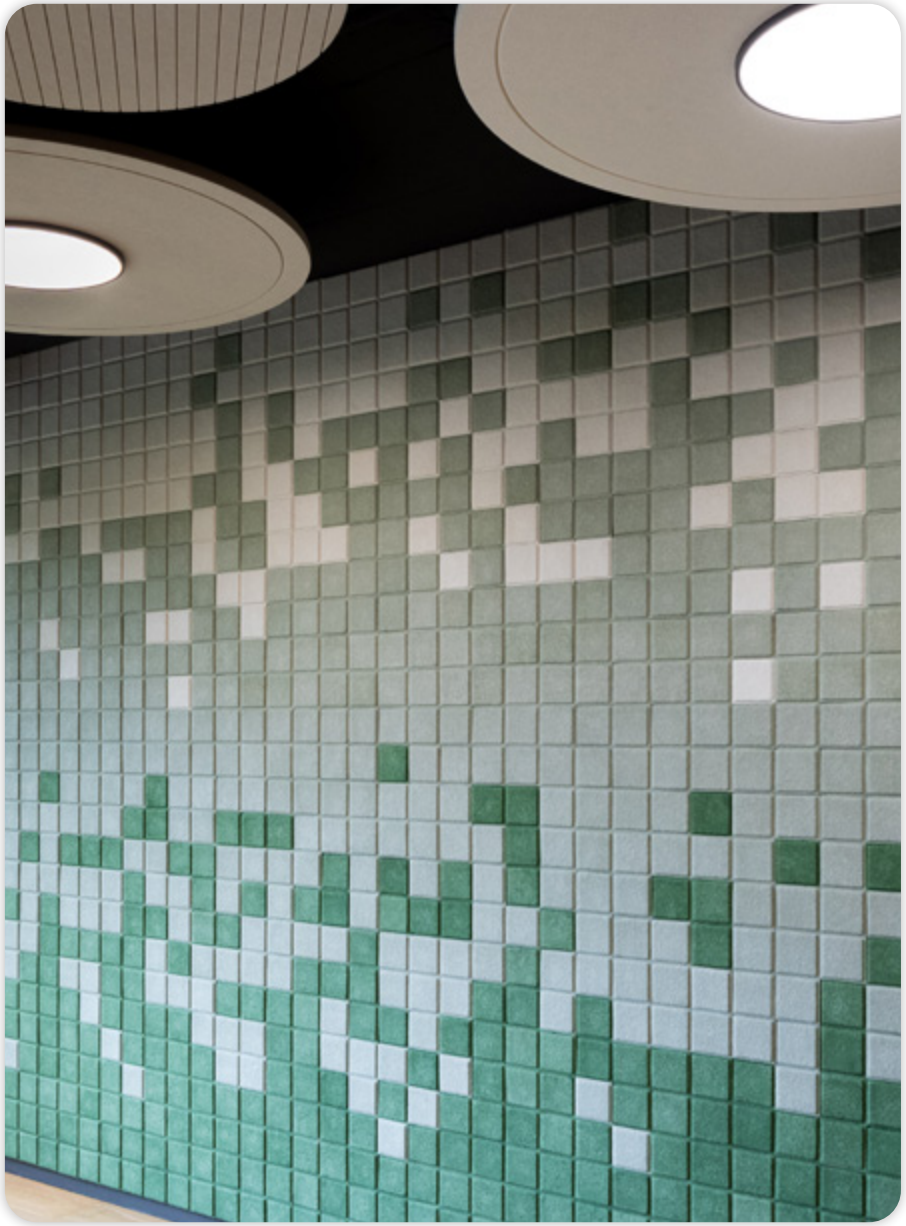

ARCHISONIC® Cotton Mosaic

https://impactacoustic.com/en/products/wall-panels/mosaic

These cotton tiles give you the ability to achieve the look of ceramic mosaic tile in spaces that call for sound-dampening, like multi-family common areas and educational facilities. Made of 73% cotton cellulose in a closed-loop system, they also boast an ASTM E84 Class A rating and VOC Emission A+ certification.

Photo, right, courtesy of Impact Acoustic

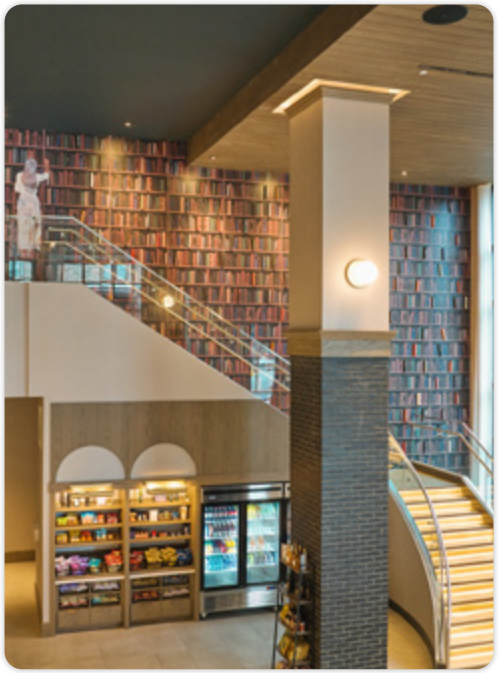

IndieWalls

https://www.indiewalls.com/art-consulting-projects

Indiewalls works with local and independent artists to create custom art programs for commercial spaces. For owners and designers, this mitigates the work involved in bringing one-of-a-kind art to projects. For artists, it helps ensure fair compensation. For end-users, it means more unique experiences and exposure to local art.

Star Tile

Neuroaesthetic Ceramic Tile

https://www.star-tile.com/

Handmade tiles that not only look good, but incorporate patterns and textures that have been shown to calm the central nervous system. The overall concept and the patterns are designed by an architect with a background in neuroscience. By directing the eye to certain points, the tiles perform a therapeutic function. The varied textures of the tiles also follow a pattern that can soothe hypersensitive people and stimulate hyposensitive people. Ideal for schools, hospitals, healthcare facilities, supportive services providers, and multi-family buildings.
